

# Connect multiple sites dynamically

Products

## MPLS/Ethernet

Our MPLS/Ethernet network is based on our own high performance and secured fiber optic lines. Our network is equipped with the most advanced technology to meet all requirements. We offer connections that provide dedicated, guaranteed and non-overbooked capacity for all your networking needs. The high availability of our service is backed by the superior security of our backbone network.

With customized Service Level Agreements (SLA), we guarantee the highest availability, guaranteed bandwidth and fast, reliable service. Our MPLS/Ethernet links are not only powerful, but also flexibly scalable to keep pace with continuously increasing data processing requirements, whether for site networking, access to cloud services or connections to in-house or external data centers.

We offer Ethernet and Internet services with capacities of up to 100 Gbps. This positions us as a leading provider in the ultra-broadband network sector.

We are committed to providing you with innovative and future-proof solutions that are precisely tailored to your needs.

# Faster. Easier. More reasonable.

Our flexibly upgradeable MPLS/Ethernet Services not only allow companies to navigate today's digital landscape, but also successfully shape the future.

- Extensive MPLS/Ethernet network in Switzerland and the Principality of Liechtenstein
- Up to 10 Gbit/s per connection
- Variety of solutions: point-to-point, point-to-multipoint and multipoint-to-multipoint
- Various monitoring and intervention models ranging from reactive to proactive
- Fast extension possibilities in order to support your growth
- We own 100% of all resources, which are exclusively housed in Switzerland
- A personal and specialized contact is available to assist with your requests
- Interconnection points to neighbouring countries
- Availability in nearly all established data centres in Switzerland
- A range of security and redundancy levels (SLA) from 99.8% to 99.99%
- Very short start-up time for new services
- Customised and scalable solutions to meet your needs
- Dedicated 24/7 Network Operation Center (NOC) in Aarau, with emergency dispatching as NOC in Oberbuchsitzen
- Project planning, support and implementation
